# Green Policy Statement

We recognise that our work may have a direct or indirect effect on the environment. We are therefore committed to reducing any harm this may cause and to work closely within our industry to this end.

Our green policy is to constantly look for ways in which we can improve our green credentials. We are achieving this by forming a network group to explore ways to achieve our statement promises and to link with like-minded organisations.

Our green strategy is constantly monitored to achieve:

- Reduced wastage of fuel
- Reduced wasted miles
- Recycling

What we are doing:

- We use Bio-diesel and LPG fuels where possible
- Our staff drive at optimum speed to aid less fuel consumption
- We work with other operators who believe in our policies
- Our network of vehicles are strategically placed to reduce miles
- We reuse or recycle all of our incoming packaging materials
- We minimise our use of paper. Our increased use of email and internet greatly reduces hard copies
- We recycle all computers and hardware
- We ensure any new projects and purchases are as environmentally friendly as possible

What we intend to do in the future:

We will work with and partner as many organisations as possible who can help us achieve our environmental goals
